Harsh Shrivastava

I'm an Android Developer with 1+ year of experience in creating Android apps. I'm eager to find new opportunities to use my skills and contribute to a great team.

EXPERIENCE

Z1 Tech, Gurugram — *Junior Android Developer*
(Feb 2023 - Present)

Outcomes:
- Successfully launched in-house applications like Flapster and Pixel Perfect, catering to specific user needs.
- Developed a robust Ads Mediation Library that simplifies the integration of ads from different platforms.
- Utilized Photoshop for designing application assets, resulting in an aesthetically pleasing user experience.
- Ensured applications are intuitive and accessible to users of all age groups.

Tools Used:
- Kotlin, MVVM, Retrofit, Livedata,
- Custom-built SDK for Ads Mediation Library.
- Google Play Store for application distribution.

PERSONAL PROJECTS

Quotes APP *(Feb 2024 - Feb2024)*

- Conceptualized, designed, and developed an Android app dedicated to delivering daily inspirational quotes for users
  Technologies Used: Jetpack Compose, Kotlin.

Notes APP *(Jan 2024 - Jan 2024)*

- Developed a comprehensive Android application for note-taking, addressing diverse user needs for personal and professional organization.
- Incorporated offline functionality to enable users to access and modify notes without an internet connection.

  Technology used : Kotlin , MVVM, RoomDb

Crop Pest Detection APP *(March 2022 - May 2022)*

- Developed an Android app for farmers using a trained CNN model to detect crop pests quickly, enhancing agricultural productivity.
  Technologies Used: Android, CNN, Image Processing.
